ABOUT US:

The company MAKOTEHNA dooel was established in September 1996, as a small company with two employees and active business status, as a company with 100% private domestic capital.

According to the size of the entity belongs to the type of small enterprises, organizational form: 05.4-dooel, and registered main business activity 20.41 - Production of soaps and detergents, cleaning and polishing products, as well as registered activity in foreign trade.

The director of the company is a graduate engineer technologist in bio-food engineering.. As a young enthusiast he began working in the field of applied chemistry, especially in the production of home chemicals and the production of antifreeze and auto cosmetics.

MAKOTEHNA over the years was a flexible company, which was able to reorient itself in the market and to produce products according to the needs of market with all the standards required by the consumer and certificates shown in the next slide.

In the year 2006 the company expands its activity and starts with the production of degreasers, cleaners and disinfectants for the food industry, with a complete program in all areas in the meat industry, dairy industry, canning industry, confectionery industry, bakery industry ,wineries, breweries as well as cleaning and disinfection products for hospitals, kindergartens, schools, hotels, restaurants and other service activities where there is contact with food, according to the ISSO standard and HACCP system, made for us and for the needs of our customers.

Quality of work

Our priority in the part of the current operation are:

- Quality and integrity;
- Offering a guarantee of impeccable service and quality;
- Availability 24 hours, every day of the week;
- Focus on satisfied customers and services;
- Orientation to continuous development;
- Permanent improvement of the quality system;
- Acting in accordance with the quality policy in all segments during operation in all areas of operation
- Above all, we are a socially responsible company.

In the domestic market, the company has successful cooperation with more than 100 companies. Our products are well accepted by our customers, primarily due to the excellent price and good quality of the entire program of MAKOTEHNA, as well as the fact that we are a domestic company for the production of a complete program.

We work in the market, we accept the new challenges and trends, but we always put the needs of our customers in the first place. Our business motto and philosophy of operation is based on the best relationship between price and quality of products.
